

EVOLUTION ARCHITECTURE OFFICES

Location: 180 Chemin des Anglais, Mascouche, Qc

Architect: Globe Architecture / Evolution Architecture

EIFS applicator: Les Revêtements Isolex Inc.

EIFS system used: ADEX-RS by ADEX Systems Inc

Completed: 2021

SUMMARY & CRITERIA

For our new offices, we wanted an inspiring and welcoming work environment that lives up to our employees. This vacant lot hosted this magnificent two-storey project offering a majestic rectangular volume resting on angular pillars.

Without hesitation, our exterior cladding selection fell on the “adex-RS” EIFS assembly from Adex Systems Inc. Not only EIFS is lightweight, allowing our design team an increased degree of freedom, it is also a major asset when it is a question of optimizing the energy performance of the envelope.

We admire the contemporary textured finish coat which blends perfectly with natural stone and wood: a winning combination.

EIFS is simply THE cladding of choice we specify for our residential customers since it offers great design versatility and its coordination on site is very simple.
